

QUADRINA

ENGINEERING AND ENERGY SYSTEMS

Comfort · Safety · Energy Efficiency

QUADRINA

Founded in 2005, among one of the oldest companies of electrical facilities, in the north of the country, Quadrina belongs to Casais Group since 2010. It is expert in the production of electrical boards, from the project design to its execution and installation.

Quadrina emphasizes a service of excellence, therefore establishes strategic partnerships with international reference groups, experts in management and energy distribution, reassuring the most innovative and sustainable solutions to any kind of infrastructure in the several markets it operates in Europe and Africa.

Quadrina has a technical and certified in-house staff to the execution of projects with domotics solutions and intelligent buildings, which allows managing in an efficient way the facilities and the use of energy in the buildings.

Mission

Provide services and integrated solutions, ensuring a quality reference, trust and efficiency to our clients. To manage with expertise and innovation, based on a culture of excellence, emphasizing strategic partnerships and integrating people.

Project

One of the most important components of the activity of Quadrina is the development of the project of energy distribution boards and HVAC.

Execution and Installation

Quadrina produces electrical boards based on the technical instructions of the manufacturing companies, assuring the fulfillment of the international norm EN 61439-1 and has a qualified technical team which installs and electrifies the different acquired electrical and electronic components.

Centralized technical management and building automation

Integration of solution systems of centralized technical management that ensure the comfort and safety inside the buildings with controlled initial investment costs and exploitation.
